## Experience activity

March 2016

Started 1 project

## **№** Cinefex iPad Edition

An iPad reader for the Cinefex visual effects magazine, with extras such as videos and image galleries.

- Facilicated transfer from original developer to Cinefex LLC
- Fixed in-app-purchase issues
- Updated video player after Apple dropped support for previous API
- Updated issue download code after Apple dropped support for previous API (notice a trend?)
- Optimized startup time and browsing
- Updated to comply with ever-changing Apple requirements

Started 1 project

Talk Dim Sum

### August 2011

Started 1 project

# ▶ Emo-Ray vs. the Intergalactic Teddy Bears

A Playstation Home driving/shooting game with alien invader teddy bears.

- Implemented collision physics among cars
- Programmer credit displayed in-world

Started 1 project

# **№** RC Rally

A Playstation Home multiplayer racing game.

Made some UI fixes just before release

#### November 2008

Started 1 project

# **№** HyperBowl

Be the ball! A Unity reimplementation of the classic bowling game, licensed from Hyper Entertainment.

- One of MacLife's Greatest iPhone Apps of 2009
- Available on the App Store and Steam
- Formerly available on the Amazon Appstore, Nook store, Itch.io, and various crappy app stores (crappstores?)

#### August 2007

## ▶ Blue Mars

A 3D virtual world implemented with CryEngine.

- Documented the Lua API and framework for creating minigames on the community wiki (a CryEngine wiki even copied part of it!)
- Integrated newer versions of Scaleform, including Scaleform IME for localization
- Tweaked CryEngine physics to support an in-world golf game
- Attended in-world developer meetings. Better than Zoom.

May 2007

### Started 1 project

# **№** Fugu Games

Small games released as webplayers, Mac widgets, and mobile apps.

- Fugu Maze, a suspense maze walkthrough that got twenty thousand downloads on the App Store in the first week and then a trickle after I started charging for it
- Fugu Bowl, a simple proof of concept for HyperBowl that got low ratings but was my most downloaded app (until Apple rejected upgrades).

#### April 2007

### Started 1 project

## ▶ Nendo

A nifty 3D modeler originally developed at Nichimen Graphics.

Updated to work on Windows XP.

#### August 2006

### Started 1 project

### ▶ Darkwatch

A vampire western for Playstation 2 and Xbox. demo builds.

Worked on HUD elements for health, ammo, special powers

- Implemented split-screen (multiple Renderware cameras) for multiplayer
- Added PAL support
- Integrated Lua scripting for audio effects and HUD elements
- Received programmer credit (but oddly required to list city of birth)

#### November 2003

## Started 1 project

## ➢ Tech Deck: Bare Knuckle Grind

A skateboarding game bundled with Tech Deck figures.

- Implemented installers so each game could be packaged separately and installed in any sequence
- Added dynamic shadows to replace the placeholder blob shadows (and then switched back to the blog shadows because the art director liked them better)
- Set up a push-button scripted build system so the producers could create a latest build from the subversion source at any time

#### December 2000

### Started 1 project

# **№** HyperBowl

A 3D attraction bowling game, rolling in fanciful locations.

- Added localization support, particularly for Jillian's installations in Montreal (French)
- Implemented support for (potential) new lanes, e.g. a toy room, motocross slope...
- Profiled, optimized (those lanes kept getting bigger and bigger)
- Fixes for new graphics cards (pesky w-buffer...)
- Changes to facilitate arcade and PC versions (I'm there in the mobygames credits)

#### March 1999

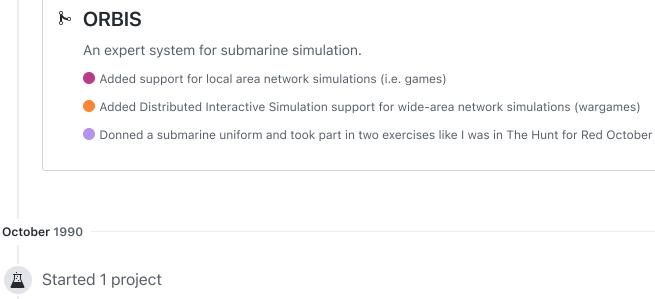

### Earned 1 award

Leverage for Planning/Scheduling

December 1999
Joined Technicat LLC
<ul> <li>working for myself</li> </ul>
November 1999
Started 1 project
▶ Neomar
One of the first mobile web browsers, conforming to WAP standards.
■ Implemented an HTTP proxy in Java for the Neomar WAP gateway
Launched on Motient's Blackberry service
Company assets acquired by Good Technology
Started 1 project  Leverage for Planning  November 1998

Bachelors degree · Computer Science and Engineering

DROID

Database Accelerator

Started 1 project

# № Multilisp

Bachelors thesis project implementing an Othello game in Multilisp (Multello) to run on the Concert 32-processor computer, trying various parallelism strategies to compare processor utilization and final performance.

- Wrote the thesis in LaTeX on a Symbolics Lisp Machine.
- Cited in a PhD thesis.

May 1987

Started 1 project

May 1984

Finished 1 degree at West Senior High School

High school degree · Iowa
