Phil Chu
Technicat LLC

Las Vegas, Nevada, US

Developing software since the 80s

Experience

working for myself   Jan 2000 - Present
Technicat LLC

Consulting and contract development, self-publishing apps and games.

working for the man   Jun 1988 - Jun 2001
various

Journeyed through the semiconductor, defense, space, computer graphics, mobile Internet, and video game industries.

Projects

Developer and publisher   Jan 2014 - Present
Talk Dim Sum

Your dim sum companion. Read about dim sum and learn how to pronounce the dishes. Available on Itch.io and the App Store.

Developer, publisher and licensee   Dec 2008 - Dec 2019
HyperBowl

Be the ball! A Unity reimplementation of the classic bowling game, licensed from Hyper Entertainment.

· One of MacLife's Greatest iPhone Apps of 2009
· Available on the App Store and Steam

· Formerly available on the Amazon Appstore, Nook store, Itch.io, and various crappy app stores (crappstores?)

Developer   Apr 2016 - Present
Cinefex iPad Edition

An iPad reader for the Cinefex visual effects magazine, with extras such as videos and image galleries.

· Facilicated transfer from original developer to Cinefex LLC
· Fixed in-app-purchase issues
· Updated video player after Apple dropped support for previous API

· Updated issue download code after Apple dropped support for previous API (notice a trend?)
· Optimized startup time and browsing
· Updated to comply with ever-changing Apple requirements

Programmer   Sep 2011 - Dec 2011
Emo-Ray vs. the Intergalactic Teddy Bears

A Playstation Home driving/shooting game with alien invader teddy bears.

· Implemented collision physics among cars
· Programmer credit displayed in-world

Programmer   Sep 2011 - Dec 2011
RC Rally

A Playstation Home multiplayer racing game.

· Made some UI fixes just before release

Interval Logic
They misspelled my name.

Programmer   Sep 2007 - Jan 2011
Blue Mars

A 3D virtual world implemented with CryEngine.

· Documented the Lua API and framework for   · Tweaked CryEngine physics to support an in-
creating minigames on the community wiki (a   world golf game
CryEngine wiki even copied part of it!)   · Attended in-world developer meetings. Better
· Integrated newer versions of Scaleform,   than Zoom.
including Scaleform IME for localization

Programmer   May 2007 - Invalid date
Nendo

A nifty 3D modeler originally developed at Nichimen Graphics.

· Updated to work on Windows XP.

Programmer   Sep 2006 - Invalid date
Darkwatch

A vampire western for Playstation 2 and Xbox. demo builds.

· Worked on HUD elements for health, ammo,   · Integrated Lua scripting for audio effects and
special powers   HUD elements
· Implemented split-screen (multiple Renderware   · Received programmer credit (but oddly required
cameras) for multiplayer   to list city of birth)
· Added PAL support

Developer   Jun 2007 - Present
Fugu Games

Small games released as webplayers, Mac widgets, and mobile apps.

· Fugu Maze, a suspense maze walkthrough that   · Fugu Bowl, a simple proof of concept for
got twenty thousand downloads on the App Store   HyperBowl that got low ratings but was my most
in the first week and then a trickle after I started downloaded app (until Apple rejected upgrades).
charging for it

Programmer   Dec 2003 - May 2004
Tech Deck: Bare Knuckle Grind

A skateboarding game bundled with Tech Deck figures.

· Implemented installers so each game could be   back to the blog shadows because the art director
packaged separately and installed in any   liked them better)
sequence   · Set up a push-button scripted build system so
· Added dynamic shadows to replace the   the producers could create a latest build from the
placeholder blob shadows (and then switched   subversion source at any time

Programmer   Jan 2001 - Invalid date
HyperBowl

A 3D attraction bowling game, rolling in fanciful locations.

· Added localization support, particularly for   · Profiled, optimized (those lanes kept getting
Jillian's installations in Montreal (French)   bigger and bigger)
· Implemented support for (potential) new lanes,   · Fixes for new graphics cards (pesky w-buffer...)
e.g. a toy room, motocross slope...   · Changes to facilitate arcade and PC versions
                                                     (I'm there in the mobygames credits)

Programmer   Dec 1999 - Jul 2001
Neomar

One of the first mobile web browsers, conforming to WAP standards.

· Implemented an HTTP proxy in Java for the   · Launched on Motient's Blackberry service
Neomar WAP gateway   · Company assets acquired by Good Technology

Programmer   Dec 1998 - Dec 1999
Leverage for Scheduling

Supply chain scheduling software for semiconductor fabs. Managed the group reponsible for installation, XML interoperability, and user interfaces.

Programmer   Nov 1998 - Invalid date
Leverage for Planning

Supply chain planning software for semiconductor fabs. Upgraded from Tcl to TclPro.

Consultant   Sep 1997 - Sep 1997
Mirai

Successor to N-World

· Fixed some graphics code (which I eventually realized was originally written by me)
· visited 3D hardware vendors in Silicon Valley (including a young nVidia) to get test cards and discuss OpenGL issues
· Used to make Gollum in the Lord of the Rings movies.

Programmer   Dec 1995 - Jun 1997
N-World

A 3D modeling and animation package descended once upon a time from the Symbolics Graphics Group (written in Lisp, shhh!).

· Ported from IrisGL to OpenGL on SGI workstations
· Ported from Irix to Windows NT
· Manager of Core Software (I made up the title)
· Used in the making of Mario 3D.

Programmer   Dec 1992 - Dec 1993
ORBIS

An expert system for submarine simulation.

· Added support for local area network simulations (i.e. games)
· Added Distributed Interactive Simulation support for wide-area network simulations (wargames)
· Donned a submarine uniform and took part in two exercises like I was in The Hunt for Red October

Programmer   Nov 1990 - May 1992
Proposal Entry Processor

A syntax-directed Emacs mode used by astronomers and Institute staff to prepare and edit Space Telescope observation proposals.

· A member of the proposal preparation staff asked for my project to be continued after I left
(but alas, no takers).

Programmer   Oct 1989 - Oct 1990
Database Accelerator

A computer architecture based on content-addressable memories. Implemented compilers and simulators and simulations for the Database Accelerator and Content-Addressable Parallel Processor.

Programmer   May 1988 - Sep 1989
DROID

A VLSI layout synthesis tool, used in-house to design new products, running on TI Explorer Lisp Machines. Added optimizations and other improvements, skipped most of the meetings (also an optimization).

Student   Sep 1987 - May 1988
Multilisp

Bachelors thesis project implementing an Othello game in Multilisp (Multello) to run on the Concert 32-processor computer, trying various parallelism strategies to compare processor utilization and final performance.

· Wrote the thesis in LaTeX on a Symbolics Lisp Machine.
· Cited in a PhD thesis.

Student   Jun 1987 - Aug 1987
START

Part time student work on a graph display for the the START natural language parser, then
running on Symoblics Lisp machines.

Publications

Learn Unity 2014 for iOS Game Development   Jun 2013
Apress

Introduction to mobile game development with the Unity game engine.
